Area of Interests: AI/ML • Backend Development • Software Development

SUMMARY

Final-year B.Tech Information Technology student with practical exposure to Python, local LLMs, prompt engineering, and FastAPI through an ongoing AI/LLM internship. Interested in developing AI-powered applications and backend systems, with a focus on understanding system logic, integrating modern AI technologies, and solving real-world problems.

EDUCATION

SNS College of Technology

Bachelor of Technology in Information Technology

Coimbatore, Tamil Nadu

Expected May 2027

CGPA: 8.05/10 (through Semester VI)

Government Higher Secondary School, Kuniyamuthur

Higher Secondary Education (Class XII)

Coimbatore, Tamil Nadu

May 2023

Percentage: 83%

EXPERIENCE

Repute

AI/LLM Intern

Jun 2026 – Present

On-site

- Work with Python, local LLMs, prompt engineering, and FastAPI while contributing to AI-powered product development.
- Explore LLM workflows and application logic involving model interaction, prompt design, and backend integration.
- Develop practical understanding of AI application development while working within a professional product environment.

PROJECTS

CodeLens AI

React, FastAPI, Python, Qwen2.5-Coder, PostgreSQL

- Built a full-stack application using a locally hosted Qwen2.5-Coder model to generate natural-language explanations for submitted code snippets.
- Developed a FastAPI backend for model interaction and a React interface for code submission, explanation display, and previous-query access.
- Implemented programming-language detection and stored code explanation history in PostgreSQL.

AI Doubt Resolution Bot

Node.js, Google Gemini API, Telegram Bot API, Google Sheets API

- Built an automated Telegram bot that answers engineering students' doubts in real time using the Google Gemini 2.5 Flash API, resolving the majority of queries instantly.
- Implemented dual-path message handling to detect complex or vague questions and escalate them to mentors, while logging every interaction to Google Sheets.
- Developed a production-grade logging module with Google Service Account authentication and graceful error handling for reliable audit trails and analytics.

TECHNICAL SKILLS

Languages: Python, Java, C, C#, JavaScript, SQL

Frontend: React, HTML, CSS

Backend & Database: FastAPI, PostgreSQL, REST APIs, .NET (Learning)

AI/ML: Machine Learning, Local LLMs, Prompt Engineering

Core Concepts: Data Structures & Algorithms, OOP, DBMS

Data & Tools: Power BI, Data Analytics, Git, GitHub, Visual Studio Code

CERTIFICATIONS & LANGUAGES

Certifications: Cyber Security and Privacy – NPTEL | JavaScript – PrepInsta | JLPT N5

Languages: Tamil (Native) | English (Working Proficiency) | Japanese (JLPT N5 Certified; N4 Candidate, Dec 2026) | Hindi (Basic)
